

1. CRI does not recommend roller style trailers. Roller trailers will void your hull warranty.
2. All FX Series boats have a 10 degree deadrise. Do not use keel rollers.
3. Drawings do not show centering bunks. CRI requires centering bunks running from approximately the axle location to the forward cross member. Centering bunks should support either side of the keel about 8 inches.
4. FX19 Side Bunks should be 12 ft in length of carpeted 2x 6.
FX17 Side Bunks should be 10 ft in length of carpeted 2x 6.

Locating 4 foot long carpeted side guides over the wheel fenders is recommended for easy loading.

Keep Side Guides LOW - just above fenders
